# Special Issue

# Slope Stability Monitoring and **Evaluation**

### Message from the Guest Editors

As a result of the ever-changing climate and frequent engineering activities, slope stability has become an increasingly prominent ecological environment issue that impacts societal development and human safety in recent years. Given the increasing intensity and frequency of extreme weather events and earthquakes. catastrophic natural and engineering disasters (e.g., landslide, rockfall, debris flow) may occur, resulting in huge casualties, economic loss, and ecological damage. Hence, it is crucial to understand issues such as slope deformation processes, slope instability mechanisms, and the influence of climate change and spatial variability on slope stability. This Special Issue aims to promote research on slope stability monitoring and evaluation. We welcome submissions from various disciplines, including but not limited to the following topics: 1) Failure modes and mechanisms of slopes 2)Impact of climate on slope stability 3)Landslide monitoring and early warning systems

4)Probabilistic slope stability assessment

5)Influence of spatial variability on slopes

6)Landslide susceptibility, hazard, and risk evaluation 7)Prevention and control of geological disasters

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
