## **Special Issue**

# New Horizons for Sustainable Architecture

#### Message from the Guest Editor

In the last century, advances in science and technology have certainly been fast and exciting, and have contributed to significantly improving human life conditions. However, such outstanding advances have also produced negative effects, as follows: at an environmental level, by progressively threatening the ecological balance of our planet, and at an economic and social level, by contributing to the unequal distribution of world wealth, and to the spread of controversial consumerist models... In this framework, this Special Issue aims to collect original research or review papers to address on (but not limited to) one or more of the following topics:

- describe the need for new and innovative design approaches, building technologies, and materials to address the housing demand from the neediest classes;
- suggest design, product, and process innovation for sustainable and affordable buildings, in case of both new constructions and renovation projects;
- propose new participatory processes for design and construction activities able to encourage an architecture for everyone.

Giuseppe Margani

## **About the Journal**

#### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
