

Special Issue

The Application and Development of Environmental Analytical Chemistry

Message from the Guest Editor

This Special Issue focuses on advancements in environmental analytical chemistry, highlighting innovative methodologies, instrumentation, and applications for detecting and quantifying environmental contaminants. It aims to showcase research that enhances the accuracy, sensitivity, and efficiency of analytical techniques used in monitoring air, water, soil, and biological systems. Topics of interest include, but are not limited to, the following:

- Development of novel sensors, spectroscopic, chromatographic, and mass spectrometric techniques.
- Application of advanced analytical tools in environmental forensics, pollution assessment, and remediation.
- Emerging contaminants, microplastics, and persistent organic pollutants (POPs) detection.
- Chemometric and machine learning approaches for data analysis in environmental chemistry.
- Green and sustainable analytical methods for environmental monitoring.

By bridging fundamental research with practical solutions, this Special Issue aims to support global efforts in environmental protection, risk assessment, and regulatory compliance.

Guest Editor

Dr. Joris Meurs

Department of Analytical Chemistry and Chemometrics, Institute for Molecules and Materials, Radboud University, 6525 AJ Nijmegen, The Netherlands

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
