

## Special Issue

# Sensory and Consumer Science for a More Sustainable World

### Message from the Guest Editors

Due to urgent global challenges, there is an urgent need to shift our behaviours to be more sustainable. The United Nations has set up 17 sustainable development goals that they hope to accomplish by the year 2030 that aim to achieve a more sustainable future. In the field of sensory and consumer science, 'Sustainable Sensory Science' was the theme for the Pangborn Sensory Science Symposium 2021, suggesting that sustainability also became a hot and key research topic in our field. This area of research is evolving quickly, especially within the past couple of years, where we have been forced to think outside the box to conduct research.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
