

Special Issue

Self-Employment Sustainability: Exploring the Long-Term Survival

Message from the Guest Editors

This Special Issue will comprise a selection of papers presenting original contributions to the analysis of entry and post-entry dynamics and the study of the determinants of self-employment survival, and policy evaluation cases. In this respect we will be interested not only in traditional entrepreneurship policies evaluations Long-run effects are not accurately captured by conventional evaluations, which are usually performed a few years after the policies are implemented, and so capture only short-term impacts, but also in their long-run effects. Papers selected for this Special Issue will be subject to a rigorous peer-review process with the aim of rapid and wide dissemination of research results, developments, and applications

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
