

Special Issue

New Perspectives on the Role of Intrinsic Motivation and Self-Regulation

Message from the Guest Editors

This Special Issue aims to gather relevant contributions around motivation and self-regulation and their interactions with engagement and performance and with well-being and quality of life of individuals and/or groups in different environments. Empirical research that allows us to synthesize and value the role of self-regulatory skills on health, adjustment, and well-being is relevant to this issue. We are interested in knowing how different profiles of self-regulatory or self-regulation strategies affect performance and engagement in different environments and how they are linked to emotional well-being, satisfaction, and quality of life of groups and individuals. We are also interested in gathering both research and reviews on the impact of intrinsic motivation on well-being and performance of individuals and groups...

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
