

Special Issue

Serious Gaming for Sustainability – Educational, Policy, and Research Perspectives

Message from the Guest Editors

This Special Issue will focus on, but is not limited to, the following questions:

- For what purposes are games used regarding sustainability?
- What type of games or which game elements lead to a successful game or gameplay?
- Which theoretical concepts are used as a foundation of game design?
- What is the role of the DSR paradigm in developing serious games?
- What are the challenges and trends in serious gaming for sustainability?
- What are the best practices in the development and adoption of serious gaming for sustainability?
- How to generate and represent cultural content in games about sustainability?
- What are examples of successful applications and case studies?
- How to evaluate the impact of gaming on sustainability?
- What are the endogenous, exogenous, and autogenous intentions of serious games on sustainability?
- How sustainable is the change of participant behaviors and resulting actions due to a serious game?
- Do policymakers come to creative solutions around sustainability?
- What are the long-term effects of playing games for sustainability?

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
