Special Issue

Sharing Mobility and Micromobility Services in Cities

Message from the Guest Editors

The sharing mobility forms, despite being in a somewhat nascent phase of development, could lead to significant changes over the long term to urban transport infrastructure systems, development and land use patterns. The six main themes related to shared mobility systems that include: (i) increasing access to activity centres and points of interest through offering more affordable and reliable transport services; (ii) diversifying transportation modes and reducing dependence on private vehicles and other heavy motorized transport thus decreasing adverse impacts such as traffic congestion, air pollution and energy consumption; (iii) releasing more urban spaces in our cities through reducing the provisioning of roads and parking; (iv) generating more opportunities for socialising and human interactions; (v) creating more economic development opportunities in service sector and tourism industry; and (vi) changing urban form and urban development patterns to allow optimized integration with shared mobility systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
