

Special Issue

Simulated Analysis of Sustainable Intelligent Transportation Solutions

Message from the Guest Editors

In intelligent transportation system (ITS), the technologies supporting communications, sensing and surveillance mechanisms, and information and control systems are spread throughout the infrastructure. This complex and multidisciplinary challenge requires a conceptual framework to guide the operations and to integrate systems, processes, tools, personnel, and data. In addition, a modular platform with proper modeling, simulating, and visualization capabilities is critical to understand the system-in-analysis, to support well-informed decisions, and to involve the general public in traffic and environmental issues. This Special Issue is dedicated to exploring the most recent advances in the simulation of ITS solutions and their related technologies. Our scope is focused on (but not limited to) the following topics:

Guest Editors

Prof. Dr. Stéphane Galland

Laboratoire Connaissance et Intelligence Artificielle Distribuées (CIAD),
Université de Technologie de Belfort-Montbéliard, 90010 Belfort,
France

Prof. Dr. Ansar Yasar

Transportation Research Institute (IMOB), Hasselt University, 3500
Hasselt, Belgium

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
