

Topical Collection

Firm Size and Sustainable Innovation Management

Message from the Collection Editors

We look for papers with theoretical insights, empirical data analysis, case studies or other suitable methods to shed new light on a variety of lines of inquiry, such as:

- repositioning/reconceptualizing the role of firm size in the context of sustainable innovation management;
- assessing which aspects of sustainable innovation management (strategic orientations, organizational structure, business models, firms' openness, etc.) are mainly influenced by firm size;
- assessing which are the specificities characterizing sustainable innovation practices, processes, and outcomes that may help to revisit the role of firm size;
- reassessing the influence of factors affecting practices, processes, and outcomes related to sustainable innovations in light of the potential moderating influence of firm size;
- evaluating the moderating/mediating factors of the relationship between firm size and sustainable innovation management practices, processes, and outcomes.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
