

## Special Issue

# Sustainability in Water Supply and Smart Water Systems

### Message from the Guest Editors

This Special Issue calls for papers to disseminate and share findings on the sustainable and smart solutions for water systems above described. Critical reviews are also invited. The objective of this Special Issue is to gather contributions on advancing scientific and technical methodologies, technologies, best practices and regulations, exploring alternative solutions for making water systems sustainable and smart. Only if system dynamics are better understood will it be possible to provide more insights for a more sustainable and smart water system design and management.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
