

## Special Issue

# Social Innovation in Sustainable Urban Development

### Message from the Guest Editor

How can a city advance from social invention to social innovation to attain sustainable urban development (SUD)? Many new ideas, initiatives, and showcases for social innovation have been introduced; however, this kind of project-based experimentation is often just part of the ongoing urban politics (or governmentality) and lacks sustainability, with traditional siloed city administrations remaining a central obstacle to SUD. For this Special Issue, we invite contributions on sustainable social innovations related to SUD. We welcome submissions on topics such as: (1) new, successful models of urban governance for city administration and SUD; (2) the role of design for SUD; (3) innovation forms and discourses on social vs. technological innovation: smart cities, responsible research and innovation (rri), digital commons, etc.; (4) diffusion of social innovation: multi-level governance, rural-urban regional systems, game changers, etc.; (5) the moral dimension of social innovation: Do we need better citizens or better institutions?

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
