Socio-Cultural Perspective for Martial Arts Tourism and Motor Recreation Research

Message from the Guest Editors

The current challenge for science in the field of leisure time activity research is to practice it as a new paradigm (Cynarski, 2014). Therefore, non-reductionist approaches should be adopted, taking into account the coexistence of many aspects of human personality and social life (contextual, temporal, processual). It is crucial to go beyond the boundaries of individual disciplines when many issues require interdisciplinary approaches. Here the scientific framework should be quite wide—from cultural anthropology, through various sociological sub-disciplines, to theories of tourism and recreation or theories of martial arts. We can focus more generally on the role of heritage in the field of physical culture, as demonstrated by martial arts. On the other hand, we are interested in using this potential in physical recreation as a free-time activity, which is the advantage of the tourist role. Let the third field of scientific search be the search for the theoretical concepts that best serve the description and explanation of various forms of tourism, of people practicing martial arts or those who are more passively interested in them.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
