Evaluating the Socioeconomic Impact of Infrastructure Investment in an Uncertain World

Message from the Guest Editors

Infrastructure investment plays an indispensable role in promoting regional economic growth and improving the quality of life. While many previous studies have attempted to evaluate the socioeconomic impact of infrastructure investment from both ex-ante and ex-post perspectives, the comprehensive understanding of the extent to which the infrastructure development has affected or is expected to affect society, the economy, and quality of life remains limited. The outbreak of the COVID-19 pandemic has further enlarged the challenges of infrastructure development. The rapid development and adoption of new services and technologies brings new opportunities for infrastructure investment. However, our understanding of the wider socioeconomic impact of the investments in these domains remains scant. Hence, it becomes imperative to develop new knowledge and approaches in order to foster sound strategies to achieve the sustainable development of infrastructure in an uncertain world. We invite submissions that explore issues related to social, economic, and environmental and comprehensive impact assessment of infrastructure investment, using new data, methods, and concepts.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
