

Special Issue

Applications of Soil Magnetism for Soil Quality Evaluation

Message from the Guest Editors

We would like to invite you to contribute to the Special Issue entitled Applications of Soil Magnetism for Soil Quality Evaluation, which will be dedicated to the soil science field and focused on soil magnetic properties as a proxy of the soil's capacity to function (e.g., soil restoration, soil development, soil pollution, and soil erosion). Soil quality surveys play a key role in evaluating the hazards affecting the soil's ability to function with regard to ecosystem services. Relevant and informative soil attributes for soil quality assessment must be selected for implementing sustainable management strategies of natural and managed ecosystems. In this Special Issue, the linkages between the physical, chemical, mineralogical, and magnetic properties for soil functioning will be elucidated.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
