

Special Issue

Soil Erosion Risk Assessment

Message from the Guest Editors

This Special Issue addresses one of the most severe environmental issues of our time: soil erosion. It is an extreme ecological issue that humanity is facing, as it washes away the fertile topsoil, deteriorates soil quality, and increases the soil sediments in stream channels and reservoirs. Extensive use of available lands for agriculture increases the soil loss at a global scale, but is especially accelerated in semi-arid regions. The development and stabilization of new soil environments and the release, transportation and storage of important environmental elements such as carbon, nitrogen, phosphorus or heavy metals are largely controlled by soil erosion. For further reading, please visit the [Special Issue website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
