

Special Issue

Solid Waste Management: An International Outlook

Message from the Guest Editors

We all are aware that currently, solid waste management is a major concern worldwide. The amount of waste generated has been growing, linked to the economic development of society, and this has led us to unsustainable lifestyles, in which large quantities of valuable resources are discarded as waste.

Furthermore, solid waste disposal involves serious risks to human health and the environment that must be avoided. This special issue aims to provide a view of the breadth of perspectives with which solid waste management is tackled internationally. We invite you to submit selected reviews, original case studies, or research articles that present and analyze the following:

- novel solutions to specific waste management challenges that can serve as a reference to others,
- proposals for new methods or results of environmental monitoring that provide new information useful to improve the design or control practices in waste management systems and facilities,
- innovative strategies, technologies, or methods for solid waste management within the framework of the circular economy.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
