

Special Issue

Sustainable Management Practices to Treat Solid Waste and Wastewater

Message from the Guest Editor

Intensive industrialization and day-to-day human activities generate solid wastes and wastewater thereby polluting the environment. Environmental pollution caused by solid wastes and wastewater is a serious concern worldwide as it threatens human and environmental health. Hence, it is of utmost importance to provide sustainable management solutions to treat solid waste and wastewater. Sustainable management practices are an effective approach to minimizing detrimental effects on the environmental and human health. This Special Issue "Sustainable Management Practices to Treat Solid Waste and Wastewater" not only aims to publish articles on classical sustainable management practices but also on modern sustainable management practices that involve efficient and enhanced clean-up of environmental matrices. All the scientists/researchers engaged in the field of solid waste management and wastewater treatment are invited for submission of original research articles and critical review papers in this Special Issue of Sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
