Special Issue

Spatial Planning and Analysis in Urban Sustainability

Message from the Guest Editors

We would like to invite you to publish an article in this Special Issue. The thematic scope of this series is based on important issues of socio-economic and spatial development, and how it relates to urban sustainability. The purpose of this Special Issue is to try to bridge the gap between planning theory and space management practice. We invite articles whose analyses are based on both quantitative and qualitative methods. In this Special Issue, we are interested in the following:

- spatial planning in problem and conflict areas
- spatial analyzes in terms of determining typical, but also characteristic directions of spatial development
- indicating good practices in urban spatial planning
- analyses of urban space presenting the dynamics of change
- analyses of spatial structures of sustainable cities
- spatial planning on derelict lands.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
