

Special Issue

Spatiotemporal Effects of COVID-19 to Sustainable Regional Planning and Development

Message from the Guest Editors

This Special Issue aims to contribute to the understanding of how regional planning and development is affected by the defragment that COVID-19 is causing to the economy worldwide, at all levels on the geographical scale and at different periods, and to highlight avenues of managing the spatiotemporal effects of the pandemic toward a sustainable context. It welcomes well-founded mainly empirical research (although theoretical ones are also welcomed) which explores, studies, and examines aspects of regional planning and development within the context of the spatiotemporal assessment of COVID-19.

The Special Issue welcomes research that studies the spatiotemporal effects of the pandemic, at all levels of geographical scale. Overall, this Special Issue intends to contribute to the revision of the conceptual links between regional planning and development and sustainability, within the context of our changing world due to the COVID-19 pandemic, and to promote multidisciplinary research contributing to a better conceptualization of our wonderfully complex world.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
