Special Issue

Species Richness and Landscape Diversity

Message from the Guest Editors

The purpose of this Special Issue is to focus on the need to develop actions for the conservation and sustainable use of biodiversity to preserve natural heritage. Species richness is a common method used to evaluate biological diversity. In addition, landscape diversity is one of the main correlates with species richness. Studies of these two concepts have increased and improved in recent years thanks to the development of new technologies in geographical information and remote sensing, as well as the consolidation of the theoretical and methodological framework in relation to the influences of this land diversity on species diversity. Several indices have been proposed to estimate the diversity of species, habitats, ecosystems and landscapes in order to quantify the landscape, its composition and its configuration. This Special Issue will contribute to an integrated understanding of the importance of species richness and landscape diversity in a holistic way that maximizes the full potential of its procedures as a tool for conservation.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
