

Special Issue

Sustainable Cities and Regions – Statistical Approaches

Message from the Guest Editors

This special issue will explore different aspects of ☒ urban and regional development with the support of various mathematical and statistical methods. We invite you to publish research carried out all over the world in order to highlight broad perspectives of the domain discussed in this issue. Relevant topics include but are not limited to the following areas:

- Urban design and city management,
- Regional planning and development,
- Public and private transport,
- Quality of life and living conditions,
- Food systems,
- Pollution of the environment (e.g. air, water, soil),
- Quality of natural resources,
- Climate and its changes,
- Ecological indicators,

with an application of statistical approaches describing these elements.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
