

## Special Issue

# Strategic Management for Sustainability: Imperatives and Paradoxes

### Message from the Guest Editors

Despite the increasing attention sustainability issues have been receiving in all sectors, key indicators suggests an alarmingly insufficient lack of progress. A climate-change crisis is even nearer than we thought. A “sixth extinction” is underway, with a million species on the verge of being lost forever. Significant losses of arable land endanger humanity’s ability to feed a growing world population. Our oceans are deeply threatened. Inequality is growing. Violence and human migration abound. Furthermore, a large portion of the business community seems disinterested—only a small percent of businesses worldwide currently participate in the UN Global Compact or the Global Reporting Initiative. ## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
