

## Special Issue

# Strategic Management for Sustainability: Imperatives and Paradoxes

### Message from the Guest Editors

Despite the increasing attention sustainability issues have been receiving in all sectors, key indicators suggest an alarmingly insufficient lack of progress. A climate-change crisis is even nearer than we thought. A “sixth extinction” is underway, with a million species on the verge of being lost forever. Significant losses of arable land endanger humanity’s ability to feed a growing world population. Our oceans are deeply threatened. Inequality is growing. Violence and human migration abound. Furthermore, a large portion of the business community seems disinterested—only a small percent of businesses worldwide currently participate in the UN Global Compact or the Global Reporting Initiative. # About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
