Special Issue

How Supply Chain Analytics Enhance Supply Chain Innovation, Risk Management, and Sustainability

Message from the Guest Editors

The focus of this Special Issue is to discuss how to increase supply chain sustainability in an analytical way via adequate innovations and appropriate risk management. The scope of this issue includes any scientific research investigating the economic, social, and environmental sustainability of all stakeholders in the supply chain industry, including but not limited to information providers, transportation, warehousing, retailing, and distribution operators. The purpose of this issue is to provide a universal platform to encourage logistics researchers and practitioners to contribute their logistics sustainability knowledge by demonstrating their insightful and empirical logistics research findings.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
