

## Special Issue

# Sustainable Entrepreneurship and Responsible Innovation

### Message from the Guest Editors

Sustainable entrepreneurship plays a key role in the development of innovations that are needed to solve grand challenges, such as climate change or food security. Sustainable entrepreneurship is a dynamic process, involving the identification, creation, and exploitation of opportunities that can generate social and/or environmental value in addition to economic benefits (Dean and McMullen, 2007; Belz and Binder, 2017), followed by the development and diffusion of innovations into mass markets (Schaltegger and Wagner 2011). It is distinct from traditional forms of entrepreneurship, which focus primarily on economic outputs. This Special Issue welcomes both conceptual and empirical contributions on the theme of sustainable entrepreneurship and responsible innovation. Authors from a variety of disciplines are invited to submit papers. Transdisciplinary research that embraces the diversity of sustainability perspectives is particularly appreciated.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
