

Special Issue

Sustainable Human Resource Management: Putting People in the Center

Message from the Guest Editor

Taking sustainability seriously as a business strategy sooner or later brings us to human resource management (HRM). This special issue aims to emphasize the importance of the human or social factor within organizations in the field of sustainability research, with a particular focus on the sustainable HRM literature. Sustainable HRM is an emerging and broad field of research that seeks to connect HRM and sustainability and requires more attention from academics and practitioners to explore the link between HRM practices and the triple bottom line (i.e., economic, ecological and societal factors). We invite authors to submit original contributions with a solid theoretical grounding and analysis of empirical data (qualitative or quantitative) that identifies current trends and evidences in the sustainable HRM field. Topic areas could include: antecedents and/or effects of sustainable HRM practices, sustainable HRM in different contexts, and integrating HRM in environmental management systems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
