

## Special Issue

# Sustainable Human Resource Management: Putting People in the Center

### Message from the Guest Editor

Taking sustainability seriously as a business strategy sooner or later brings us to human resource management (HRM). This special issue aims to emphasize the importance of the human or social factor within organizations in the field of sustainability research, with a particular focus on the sustainable HRM literature. Sustainable HRM is an emerging and broad field of research that seeks to connect HRM and sustainability and requires more attention from academics and practitioners to explore the link between HRM practices and the triple bottom line (i.e., economic, ecological and societal factors). We invite authors to submit original contributions with a solid theoretical grounding and analysis of empirical data (qualitative or quantitative) that identifies current trends and evidences in the sustainable HRM field. Topic areas could include: antecedents and/or effects of sustainable HRM practices, sustainable HRM in different contexts, and integrating HRM in environmental management systems.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
