

Special Issue

Sustainable and Intelligent Transportation Systems in the Era of the COVID-19 Pandemic

Message from the Guest Editors

This Special Issue invites scholarly work that has studied ITS to explore impacts or deployments to enhance aspects of sustainability in transportation. Topics include (but are not limited to) analyses using automated, cooperative and connected mobility; smart city technologies; new forms of mobility; intelligent infrastructure; supply chain; new services from new technologies and solutions for cities and rural areas, to measure, locate, analyze or optimize transportation services from a sustainability standpoint (greenhouse gas emissions, energy consumption, etc.); Internet of Things (IoT); electric vehicles; and technological architectures for sustainable transportation technologies. Applications can also include more bleeding-edge technologies such as automated mobility and blockchain.
