Special Issue

Sustainable Management in Agricultural Irrigated Systems

Message from the Guest Editor

Agriculture is facing multiple crucial challenges. In order to feed the growing world population, which could reach more than nine billion by 2050, it will be necessary to double the production of crops. This, in turn, is driving agricultural expansion and intensification. However. there is a growing focus on the sustainability of the agricultural production system, especially in arid and semi-arid regions, where irrigation is required for competitive and profitable agriculture. The increase in irrigation water demand, the effects of climate change (that will decrease the availability of water for agriculture) and the growing concern about the negative impacts on the environment induced by irrigation (water bodies pollution, overexploitation of aquifers, farmland salinization, etc.) are calling for more effective and efficient use of irrigation water and other agricultural inputs, such as nutrients and pesticides.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
