

Special Issue

Sustainability in Wildlife Management

Message from the Guest Editor

This Special Issue will address the complete spectrum of sustainability question in wildlife management and preservation. It will take a look not only at harvested populations, but also, for example, at protected populations or those treated in any other manner (population control, wildlife tourism, etc.). In addition, we aim to place more emphasis on the economic and socio-cultural aspects of sustainability. Major problems that are to be discussed are:

- The uncertainty of the underlying data (especially a problem with models);
- The subjectiveness of validation (especially a problem for socio-cultural aspects).

A special aspect should be the question of wildlife management under changing environmental conditions, such as urbanization or climate change.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
