

Special Issue

Information and Perception Technologies Development and Applications in the Transportation Sector

Message from the Guest Editors

The Special Issue titled “Information and Perception Technologies Development and Applications on Transportation Sector” provides an international forum for the dissemination of the latest original research, achievements, and developments in many areas of the transportation sector. The Special Issue aims to provide a multidisciplinary forum for researchers, industries, operators, and infrastructure managers involved in the different fields of the transportation sector to present innovative results and to introduce to a broader audience the more recent publicly financed projects aiming to introduce new technologies and innovation in the transport domain. This Special Issue encourages scientists and industrial operators to publish their experimental and theoretical research about topics related but not limited to:

- New transport management systems to improve system management and sustainability
- Transport sustainability
- Introduction of new technologies in the transport domain to improve its efficiency and sustainability
- New platforms and demonstrators for innovative transport systems
- Multimodality

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
