

Special Issue

Resilient, Safe and Sustainable Solutions for Freight Transport and Logistics

Message from the Guest Editors

The COVID-19 pandemic has clearly highlighted the essential role played by transport and logistics in preserving well-functioning supply chains and in supporting national economies. However, it is well known that freight transport produces many negative externalities, such as pollution, congestion, and accidents, which strongly affect people's lives. Therefore, to properly address the increasing demand of freight without negatively affecting communities, this sector will have to deal with some of the current challenges in the near future. This Special Issue focuses on solutions that can help future freight transport and logistics to become smarter, safer, and more sustainable. Keywords

- efficient and interconnected multimodal transport system
- post-COVID-19 freight solutions
- smart solutions for sustainable transport and logistics
- resilient in transport solutions
- truck platooning
- syncro- and intermodality
- decarbonization strategies in transport and logistic

Guest Editors

Dr. Claudia Caballini

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
