Special Issue

Sustainability, Innovation and Competition: Emerging Actors and Challenges in Supply Chain Management

Message from the Guest Editors

With the growing environmental awareness of the public and the implementation of government regulation and laws, organisations are making more efforts to employ sustainable practices such as green innovation and sustainable supply chain management. Sustainable supply chain management is concerned with integrating environmental, social, and economic goals across a focal firm's supply chain process and is considered an appropriate approach to improve sustainable outcomes in their supply chain.

More studies on how to balance resources and make good decisions on sustainable practices are needed. Meanwhile, with the rapid development of disruptive innovation, technologies such as IoT, AI, and big data analytics have been widely adopted into sustainable practices. Moreover, previous studies have pointed out that dynamic capabilities should be decomposed into identifiable and specific routines. This Special Issue welcomes full research articles and case studies that focus on part of the supply chain and use sustainability as the primary lens of assessment.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
