

Special Issue

Optimising Air Quality and Health Benefits of Transport Decarbonisation

Message from the Guest Editors

The TRANSITION Clean Air Network (<https://transition-air.org.uk/>) is a programme led by the University of Birmingham in collaboration with 9 universities and over 20 cross-sector partners, which seeks to deliver air quality and health benefits associated with a transition to a low-emission transport economy. Submissions could relate but are not limited to the following topics and questions:

- Characterising emerging air quality challenges—what are the current and future transport pollution sources and how will these determine health benefits and harms?
- Understanding transport choices and behaviours—how will changes in mobility choices and patterns driven by transport decarbonisation change population exposure to air pollution?
- Supporting industry-led research and innovation—obtaining key primary datasets, developing new technologies, or developing standards and/or test methods to assess compliance therewith;
- Co-creating a framework for policy solutions—which planning processes/policy guidance need to be ada

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
