

Special Issue

Sustainable Economy and Corporate Responsibility

Message from the Guest Editors

An increasing number of studies may be evaluated in the recent literature concerning Sustainability and Corporate Responsibility. Indeed, corporate responsibility is about a business trying to do well in the community through opportune responsible strategies. Sustainability can be seen as a part of corporate social responsibility, while corporate responsibility does not always consider sustainability. Corporate responsibility usually considers a firm's commitment to practice environmental and social sustainability and to be good stewards to the environment and the social landscapes in which they decide to operate.

The aim of this Special Issue is to further investigate the link between sustainability actions source strategy and corporate responsibility focusing attention to the exploration of the phenomenon from a quantitative perspective. The analysis, based on the specific statistical methods and economic tools, could suggest the more adequate policy recommendations to stimulate economic growth in a more sustainable context.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
