

Special Issue

Sustainable Supply Chain and Logistics Management in a Digital Age

Message from the Guest Editors

With advance of information and digital technologies, the sustainable supply chain and logistics management are useful for industries not only to address operational and logistics issues, but also to integrate environmental and social sustainable development issues.

In the current digital age, there are still many issues in the field of sustainable supply chain and logistics management that need to be explored in depth. For example, new emerging technologies (e.g., big data, cloud computing, Internet of Things, sensors, and blockchain technology) have been applied to supply chain and logistics management recently.

The specific research questions addressed by this Special Issue call are as follows: (1) Will the new technology help toward the adoption of the sustainable supply chain? (2) How can we select the most suitable sustainable and green logistics suppliers/vendors and partners? (3) How can we measure the innovation level of sustainable supply chain and logistics? (4) How can we improve the performance of the sustainable supply chain and logistics management in the digital age? (5) How can we assess the technological level of sustainable supply chain and logistics?

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
