

Special Issue

Sustainability Accounting and Reporting

Message from the Guest Editors

Sustainability accounting, also referred to as corporate responsibility (CR) reporting, corporate social responsibility (CSR) reporting, or environmental, social, and governance (ESG) reporting, is the measurement and reporting of an entity's sustainability-related activities to external stakeholders. Sustainability accounting, in general, focuses on reporting the activities, which have a significant impact on environmental matters, contemporary social issues, the sustainability of resources, and the performance sustainability of an entity. These activities, while inherently industry- and firm-specific, cover a broad spectrum of areas such as environment, employee/community relations, human rights, diversity and inclusion, and controversial product involvement. With the rapid growth of companies' engagement in sustainability activities around the world, sustainability accounting now serves important roles in corporate disclosures. This Special Issue will provide insights into this fast-growing area of accounting and help improve our understanding of the relevance and reliability of sustainability information contained in corporate disclosures.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
