

## Special Issue

# Interactions between Environmental, Economic and Social Sustainability for Adolescent Development

### Message from the Guest Editors

With intensified global interest in questions of sustainable development as highlighted by international dialogues around the 2021 UN Conference on Climate Change, this Special Issue aims to critically examine the way in which the three Sustainable Development pillars—environmental, economic and social—interact in relation to adolescent and youth wellbeing and development in diverse low- and middle-income countries. We invite abstracts that explore these interactions empirically and attend to the ways in which policy and programmes can more effectively support the development, empowerment and agency of adolescents and ensure that sustainable development approaches are inclusive of all young people.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
