

Special Issue

Sustainability in Architecture and Engineering

Message from the Guest Editors

There are many factors affecting this unsustainability: the unavoidable need for new structures and infrastructure, especially in developing countries; the aging of the existing housing stock, which requires rehabilitation/retrofitting; energy inefficiency; lack of resources, etc. On the other hand, the world is trying to move towards safety, inclusion, resiliency, and sustainability (United Nations 2030 Agenda), boosting the circular economy and the introduction of green technologies (i.e., EU “Renovation Wave” and “Green Deal”). Hence, construction, one of the most preeminent industries, must begin facilitating such processes and supporting green and digital recovery as soon as possible, and make a transition to clean energy. This call for papers is also in support of the European Project “Smart Rehabilitation 3.0 Innovating Professional Skills for Existing Building Sector” Erasmus+ Program, Key Action 2: Strategic Partnership for Higher Education (smart-rehabilitation.eu; Instagram profile: @smart_rehabilitation).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
