

## Special Issue

# Sustainability, Climate Change, and Ecology: Challenges and Opportunities

### Message from the Guest Editors

Biodiversity, ecosystem services, and food production rely on the availability of natural resources such as freshwater, soil quality, and habitat conservation, yet human activities overexploit natural resources at unsustainable rates, causing biodiversity crisis, food insecurity, and irreversible damage to the Earth's ecosystems. To address these issues, it is necessary to develop strategies that support environmental conservation and a sustainable use of natural resources. The purpose of this Special Issue is to expand the state-of-the-art in strategies and management solutions that aim to mitigate and reduce human-induced threats to the environment:

- Adaptation practices to climate adversities
- Ecosystem restoration
- Biodiversity conservation
- Groundwater overdraft reduction
- Best practices in soil conservation
- Sustainable forest management
- Sustainable fishing
- Sustainable livestock management
- Food security and climate change
- Community resilience in the face of climate change

---

### Guest Editors

Dr. Teresa Patricia Feria-Arroyo

Department of Biology, University of Texas Rio Grande Valley, Edinburg, TX 78539, USA

Dr. Engil Pereira

School of Earth, Environmental, and Marine Sciences, University of Texas Rio Grande Valley, Edinburg, TX 78539, USA

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
