

Special Issue

Sustainability of Energy Supply Chains and Systems

Message from the Guest Editors

Securing affordable and clean energy is a Sustainable Development Goal of the United Nations which deserves great attention because of its large impact on all the sustainability pillars and, in turn, on further sustainability goals. The ongoing challenge for industrialized as well as for emerging economies, is *where* can we get sustainable energy and *how* can we structure the energy and logistics systems to improve the sustainability performance of energy supply. This Special Issue aims to collect contributions on models and methods emerging in this field, but especially on their application to the wide variety of practical problems and systems which represent the implementation of the challenge of sustainable energy supply. For further reading, please visit the [Special Issue Website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
