

Special Issue

Sustainability and Green Construction

Message from the Guest Editors

This special issue promotes alternative sustainable construction methods to conventional ones through seeking novel and cutting-edge researches. Topics of interest include but are not limited to:

- Material selection and sustainable design
- Structural sustainability
- Alternative materials, recycled materials, and material resilience
- Rheology, strength, and durability of green concrete
- Structural behavior of green concrete structures
- 3D-printing techniques
- Energy-efficient buildings
- Eco-friendly construction strategies
- Green building practices
- Sustainable repair and strengthening techniques
- Carbon upcycling technologies
- Sustainable structure performance
- Life-cycle cost assessment of green buildings
- Modeling sustainable behavior and case studies

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
