

Special Issue

Sustainability and Innovation in Transport Infrastructure Geotechnics

Message from the Guest Editor

Recent years have witnessed an increasing environmental awareness and the recognition of the importance of reducing waste generation and the consumption of non-renewable natural resources. The design and construction of transport infrastructure can significantly contribute to overall sustainable development by adopting sustainable practices, such as the use of alternative, environmentally friendly materials and the reuse of waste materials, leading to a substantial reduction in the carbon footprint of such infrastructure projects. This Special Issue of *Sustainability* welcomes original research papers addressing the development of innovative and sustainable approaches in geotechnical design, construction, maintenance and rehabilitation of transport infrastructure, with special reference to the use of recycled waste materials and geosynthetics. Submissions reporting laboratory, field and numerical studies are encouraged, as well as case studies describing original work on the topic.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
