

Special Issue

Sustainability Issues in Supply Chain Management

Message from the Guest Editors

As the outlook for globalization grows cloudy and COVID-19 spreads, its effects on supply chains around the world are amplified. Supply chain management has become more challenging, and sustainability is being emphasized. Innovative and sustainable practices are developed, which would affect every aspect from the last-mile delivery to the entire supply chain. There are three main aspects of factors challenging the existing theories of supply chain management: Emergencies and geopolitics, Digital technologies, and Environmental responsibility and green technologies.

In response to the increasing pressures to incorporate innovative sustainable practices into supply chain management, this Special Issue aims at attracting research focused on the general theme of sustainability, with particular attention to the contemporary factors affecting unforeseeable disruptions of supply chains and to the potential of technologies to enhance the sustainability of supply chains. We believe this topic will capture a variety of contributions due to cross-cutting issues, including digital technology, emergency, geopolitics, energy, environmental performance and responsibility, and other fields.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
