

## Special Issue

# Sustainability Management Strategies and Practices

### Message from the Guest Editors

Sustainable development and sustainability are an increasingly relevant issue for a wide range of organizations and cover economic, environmental, social dimensions and require a multidisciplinary approach in order to explore, examine, and critically engage with issues and advances in these and related areas. In addition to covering the three pillars of sustainable development, other areas were covered, including governance and sustainability, energy return on investment, renewable energy self-sufficiency, and sustainability assessment and policies. Therefore, sustainability management strategies and practices are of growing significance. Many sustainability impacts are strongly influenced by management decisions, and the operations management function embraces the requirements of sustainability management. This has implications for processes and decisions associated with all aspects of operations management. This Special Issue aims to address questions related to the impact of management on the sustainable development or sustainability of organizations.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
