

Special Issue

The Impact of COVID 19 on Sustainability of Organizations

Message from the Guest Editor

The occurrence and persistence of COVID-19 have changed our private lives dramatically, and have altered organizational working and behavior. Despite this, we have witnessed a steady increase in concerns related to the sustainability of organizations around the world in the last decade. These concerns are expressed in numerous studies. More research focusing on the impact of COVID-19 on sustainability is needed, as concern for sustainability becomes “sensitive” when in the midst of a crisis situation, as we are witnessing now with COVID-19.

This Special Issue seeks a wide range of contributions that assess how current economic circumstances influence and shape the sustainability of organizations. Contributions that combine current challenges in organizations, when addressing the impact of COVID-19 on the sustainability of organizations, are highly welcome. In this context, we would like to highlight the digitalization of organizations, the role of future generations, diversity issues, and many others, in the context of the sustainability of organizations in the current COVID times.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
