

Special Issue

Sustainability Perspectives on Fire and Smoke

Message from the Guest Editors

This Special Issue seeks original, policy-relevant research articles that will provide new insights and expand our knowledge of the total social and economic burden of wildfires and agricultural fires, and how this integrates into sustainability considerations (e.g., ecosystem restoration, forest and agricultural land management, and community adaptation). Potential topical areas might include (but are not limited to):

- Fire and smoke impacts to labor markets, wages or retirement decisions;
- Integration of smoke impacts into land management decision support systems
- Fire and smoke impacts to worker productivity;
- Fire and smoke impacts to educational outcomes;
- Fire and smoke impacts to health outcomes not previously considered in the literature;
- Happiness or life satisfaction effects of smoke;
- Nonmarket valuation of smoke impacts;
- The nexus of sustainable forest management (including smoke) and wildfire risk;
- The nexus of sustainable agricultural land management (including smoke) and the burning of crop residuals;
- Community adaptation to smoke; and
- Social equity and distributional considerations.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
