Special Issue

Sustainability and Project Management

Message from the Guest Editors

Sustainability is based on the concept of sustainable development. This concept could allow current generations to meet their needs and have a healthy and productive life in harmony with nature, without compromising the ability of future generations to do the same. Therefore, integral sustainability rests on at least three pillars, based on environmental, social, and economic concerns that have to be taken into account throughout the entire life cycle of the activity, product, or service in question.

The environmental pillar must be aimed at preserving the planet in conditions suitable for life. Without it, the human race could not survive, and there could be neither society nor, therefore, economic activity. Consequently, it is the most important pillar. More details at:

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
