

Special Issue

Sustainability Through the Textile and Apparel Supply Chain

Message from the Guest Editor

Sustainability is a complex topic that encompasses many different issues from a variety of areas, e.g., environmental impact, social considerations, and economics. The textile and apparel supply chain is also very complex, as it includes everything from raw material selection and development, design considerations, processing, sourcing, distribution and marketing, to consumer use. There are many sustainably issues within this supply chain that should and can be addressed. For further reading, please visit the [Special Issue website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
